

Dear Commissioners,

I have been an active amateur radio operator for almost 50 years and support the band segment plan in RM-10352. The 160 meter band is attracting many of the newcomers in the amateur ranks because this a new but old frontier and the challenge this band represents.

By implementing RM-10352, this will encourage more growth in the amateur ranks.

Sincerely yours,  
Spencer M. Lazar
